

PRESS RELEASE**Chenavari Investment Managers - Sustainability Report 2021**

Chenavari Investment Managers announced today the release of its inaugural Sustainability Report.

This initial report, which will be updated and released on an annual basis, demonstrates 2021 as a transformational year for Chenavari's ESG efforts. Highlights include the publication of Chenavari's Policy of Responsible Investment, the Firm becoming a member of the UNPRI, and the rollout of ESG integration approaches across its investment products.

Loic Fery, CEO and Co-CIO of Chenavari, said: "I am pleased to present this inaugural Sustainability Report. The Report should be read as an early effort at increasing transparency rather than as an exhaustive presentation of all the ESG issues and opportunities faced by the Firm."

Chenavari believes that ESG considerations will increasingly drive economies and markets, with global societal issues and concerns such as climate change ushering in a new era for responsible investment and corporate social responsibility. The Firm continues to finetune its ESG approach as it navigates the rapidly evolving regulatory backdrop and the challenges associated with ESG data.
